

**THE SMALLEST, MOBILE AND
FLEXIBLE WATER DESALINATION
SOLUTIONS FOR DEFENSE,
MARINE, EMERGENCY AND
DISASTER CASES,
APARTMENTS/HOUSEHOLDS**

SCOPE ASIA water solutions are noiseless, compact, high-efficient and fully automatic. Our water solutions are ideal for defense, marine – whether you own a yacht, a sail boat or any vessel – emergency and disaster cases, apartments and households. The three-years warranty for ERS are backed up on each products.

SCOPE ASIA MOBILE SEAWATER CASE 30/50 REVERSE OSMOSIS FOR SEAWATER

- Capacity per hour: Max. 30/50 Litre
- Power Supply: Grid and Solar Power
- Dimension (L x W x H): 816 x 50 x 306 mm
- Suction Capacity: Horizontal 10 m

ZEN

Range: 30-150 litres/hour

All components are integrated in the main manifolds and there are very few external components like fittings, pipe, valves.

These features make the Zen watermakers very compact, with a special ultra-flat design. Zen in fact is designed to fit into tight spaces and can be installed in every positions, horizontally as well as vertically. Not much bigger than a briefcase!

Zen technology is patented.

SMART

Range: 30-100 litres/hour

Smart technology is mainly based on single, long membranes. Conveniently main components of the Smart watermakers (ERS, membranes, valves, pipes) are separated.

Therefore inspection and maintenance of internal components is very simple. Smart is available in 3 different control options.

MODULAR

Range: 35-500 litres/hour

Likewise the Smart watermaker also Modular main components are separated and there are 3 different control options.

Furthermore Modular uses split membranes and so the external dimensions are quite different from the Smart.
