

TESTIMONIAL LETTER - 18 /11/ 2021

FOR: SCOPE ASIA INTERNATIONAL

Barbara Lietz and her team of professionals have been instrumental in helping our health tonic company JWU BOTANICALS grow in this very difficult time.

They guided us to solutions & logistics. With their support we were able to reach our ultimate goal: An innovative new export product
- Our BALI TURMERIC - 2 litre - Bag in Box.

Barbara's wealth of business experience greatly assisted us in our formative business and financial planning. She worked tirelessly to find the perfect packaging system with the benefits of FDA certification. This was the perfect solution for our new product. It gave us a longer shelf life and cost value for the consumer. Supporting us immensely by sharing her vast network of local and international partners. Connecting us with distributors in the European & Australian markets was a life-line.

SCOPE ASIA INTERNATIONAL researched and sourced our high quality processing machinery and packaging from Switzerland. They undertook all the shipping & export logistics to deliver it to our kitchen factory in Bali. Their in-house Engineer Ronny Graul solved many technical issues and has been a great support throughout this project.

With trust & patience we have been on an extraordinary journey together to create a natural turmeric health tonic that we can distribute globally. A product we are proud of that will assist the daily wellness of many people.
