### Appreciation Letter

To whom it may concern

Dom Bosco has been working with Scope Asia Timor LDA and Timor Foundation since 2013. Since 2012, we have had personal contact with Mrs. Barbara Lietz. Our school in Fatumaca was the first contact which Ms. Lietz chooses to set up the idea to implement the water solution projects in Timor Leste. Dom Bosco was signing on MOU 2013 to be a technical partner for vocational training for maintenance issues as well. Ms. Lietz has been working extensively on the realization of the projects in Timor Leste.

Meanwhile, Scope Asia Timor LDA has implemented more than 20 installations of water purification machines with Trunz Water Systems. The technical support is carried out exclusively by trained technicians of Dom Bosco Institute. The specific training is provided by Training Partners of Trunz Water Systems and Scope Asia Timor LDA on site in Timor Leste. Vocational Training is conducted by Scope Asia Timor LDA.

Fatumaca School itself has a water purification machine TWM01 light, which is used in the school for the students. Another machine will be used in the next few weeks in Dom Bosco Dili. We are very satisfied with the produced water quality.

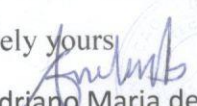

The water purification machine guarantees no bacteria and viruses and the highest amount of calcium carbonate in the water is removed. This quality and longevity of the machines is the prerequisite for the sustainable success for a positive development of the health and the quality of life for human beings in Timor Leste

It should be mentioned that the Water Production Unit in Dili, which has been in operation since 2015, is producing water boxes in different sizes works very well. We from Dom Bosco also order the BaginBox 5 litre and 10 litre for our different institutions.

Our cooperation support the development of an sustainable water supply for the country.

We thank Scope Asia LDA for their dedication and their continued commitment and contribution with the water purification machines from Switzerland and Finland for Timor Leste.

Sincerely yours

  
Bro. Adriano Maria de Jesus, SDB  
Don Bosco Technical School Timor Leste
